The effect apply to all shapes

The image features three Edison-style light bulbs with visible filaments, glowing with a warm, golden light. The bulbs are arranged on a dark, textured surface. The central bulb is the most prominent, showing its intricate filament structure. To its right and slightly behind, another bulb is visible, and above it, a third bulb is partially obscured. The lighting is dramatic, highlighting the texture of the glass and the metallic base of the bulbs. The overall mood is warm and nostalgic.

SKD SALES MODE

A row of glowing Edison-style light bulbs hanging from a dark ceiling against a dark background. The bulbs are arranged in a line, receding into the distance. Each bulb has a visible filament and is encased in a clear glass globe. The light they emit is a warm, golden-yellow glow. The background is a dark, textured surface, possibly a wall or ceiling, which is slightly out of focus. The overall mood is warm and classic.

Advantage compared to T30 LED filament

- More straight because of buckle construction
- Light is continuous, but light for T30 LED filament is disconnected
- Length can be freely customized
